PROFESSIONAL SUMMARY

Computer Systems Engineering undergraduate with solid academic grounding in computer networks, operating systems, and system-level programming. Familiar with TCP/IP protocols, IP addressing, and basic router/switch troubleshooting. Active technical community contributor with leadership experience. Seeking an internship in Networking, IT Support, or Computer Systems.

SKILLS

1. Networking & Communication Technologies:

- **TCP/IP Protocol Suite:** Solid understanding of TCP, UDP, IP, ARP, ICMP, and their roles in reliable and connectionless communication across networks.
- **OSI & TCP/IP Models:** Familiar with layered network architectures and their application in network design, troubleshooting, and performance analysis.
- **IP Addressing & Subnetting:** Proficient in IPv4 addressing, subnet calculation, and network segmentation for efficient IP utilization.
- **Routing Fundamentals:** Basic knowledge of routing concepts, static routing, and routing table behavior within IP networks.
- **Switching Fundamentals:** Understanding of Ethernet switching, MAC addressing, and basic VLAN concepts.

2. Programming: Experience with:

- **Data Structures & Algorithms:** Proficient in implementing and optimizing data structures and algorithms for efficient problem-solving and algorithmic thinking.
- **Object-Oriented Programming (OOP) Concepts:** Experienced in applying OOP principles such as encapsulation, inheritance, and polymorphism to design and develop modular and maintainable software systems.
- **Test-Driven Development (TDD):** Experienced in writing tests before writing code to ensure software reliability and maintainability.
- **C and C++:** Proficient in C and C++ programming languages.
- **Verilog:** Experienced in hardware description language (HDL) for digital circuit design.
- **MATLAB:** Proficient in using MATLAB for signals processing and analysis.

LANGUAGES

- English
- Urdu
- Pashto

CERTIFICATION

- Matlab Ornamp(mathwork)
- Introduction to networking
- Programming Foundations Algorithm

WORK EXPERIENCE

Networking Intern

XYZ Tech Solution, Peshawar KPK

Duration: **July 2027 – November 2027**

Description of Responsibilities:

- Assisted in the configuration, monitoring, and troubleshooting of network components including routers, switches, and end devices.
- Collaborated with team members to troubleshoot and resolve network connectivity and performance issues.
- Conducted code reviews and provided feedback on best practices.

Accomplishments:

- Implemented a new feature that improved the efficiency of data retrieval by 20%.
- Received positive feedback from team members for consistently meeting project deadlines.

EDUCATION

Bachelor of Science in Computer Systems Engineering
University of Engineering & Technology Peshawar, KPK
Duration: 2023 – till

Relevant Coursework:

- Systems Programming, and Computer Programming
- Data Structures & Algorithms
- Object-Oriented Programming

Additional Training or Certifications:

- Certification in Signal Processing Onramp from MathWorks
- Workshop on Data Analysis with Python

Intermediate in Pre-Engineering
Al-Hadi Public School And College Mishti Mela Orakzai
Duration: 2020 – 2022

Sports and Extracurricular Activities:

- Member, Cricket team

Achievements and Awards:

- Ranking in top 3 students

Matriculation in Science
The Wisdom Institute of Science & technology Hangu
Duration: 2018– 2020

Sports and Extracurricular Activities:

- Member, cricket team

Achievements and Awards:

- Ranking in top 3 students

PROJECTS

1. Memory Matching Game Through SFML Library

Description: Developed an interactive 2D memory matching game using C++ and SFML, implementing object-oriented design and real-time user interaction. Designed game logic with score tracking and progressive difficulty to enhance player engagement.

Technologies Used: C++, SFML, OOP, 2D Graphics, Event Handling, Git/GitHub

2. Banking Management System Using C++ & Data Structure

Description: Developed a Banking Management System in C++ using Data Structures and Algorithms (DSA) to efficiently manage customer accounts and transactions. Implemented core features such as account creation, balance management, searching, and file-based data storage.

Technologies Used: Arrays / Vectors, Linked Lists, Hash Tables, File Handling (for data persistence), Searching & Sorting techniques.

3. Calculator Application Using Mips Assembly

Description Developed a command-line calculator using MIPS assembly language to perform arithmetic operations including addition, subtraction, multiplication, and division. Implemented low-level logic using registers, system calls, and control flow to handle user input and output operations.

Technologies Used: MIPS Assembly, SPIM/MARS, Registers, Syscalls, Control Flow
